

FOR IMMEDIATE RELEASE

Greenpoint Designs V-VIP Interior Concept for Boeing Business Jet 777X

Kirkland, Wash. – 19 December 2018 – [Greenpoint Technologies](https://www.greenpointtechnologies.com) supported the Boeing Business Jet BBJ 777X reveal at the Middle Eastern Business Aviation Association (MEBAA) 2018 show with a new V-VIP Interior Design Concept.

Greenpoint’s award-winning Design Team showcased the new globe-spanning BBJ 777X by designing the *Lotus* interior concept, which leverages the world’s most spacious cabin available in a twin-engine business jet.

Design Director Annika Wicklund explains, “*Lotus*’ inspiration began with the wide 777X cabin and the desire for multifunctional spaces, advanced connectivity and unique features that set the interior apart from traditional private business jets. Our team aimed to design a contemporary, functional interior with luxuries experienced at a world class hotel. The result is a spacious, reflective and welcoming interior.”

Greenpoint’s 777X *Lotus* V-VIP interior features a Grand Entry and open Lounge ideal for entertainment and social gatherings. Hardwood steps lead to an Elevated Lounge, complete with a raised ceiling, business or dining seats, and a backlit bar overlooking a sunken Media Lounge. The

Media Lounge features a large, curved monitor, adaptable divan with high-low ottomans, and custom LED lighting. The interior also contains a Library, Guest Suite and Master Suite. The Master Suite features a king size bed framed by a custom, artistic canopy headboard, a spacious walk-in Dressing Room with heated hardwood flooring. The Master Lavatory also offers heated marble flooring and towel warmers, a black marble vanity with embedded monitors, and an oversized rain shower.
